

RESOURCE MINE
MANAGEMENT

CAPABILITY STATEMENT

RESOURCE MINE MANAGEMENT

We are a Mining Operations and Asset Management consultancy providing optimisation services globally across multiple mining commodities.

Our team of demonstrable change agents are uniquely experienced and qualified in Asset & Maintenance Management, Mine Site Management (General Manager/Operations Manager) and Business Improvement.

CORE COMPETENCIES

Our exposure allows us to engage at all levels, from the pit/workshop to the board room, and effectively lead change across all mine site functions.

Asset Management & Maintenance Services

RMM can help your operation(s) with Asset Management Frameworks along with all phases of the Asset Life Cycle, from pre-acquisition to end of life management and extension.

Budgeting & Cost Control

The mine site budget is the back bone of the operation and is often how success or failure are measured. With 30-40% of a LoM budget being asset related costs, it is critical to start with a good base.

Technology and Mine Site Greenhouse Gas Abatement

RMM is experienced with and can assist with your pathway to net zero while minimising disruption and cost to the operation(s).

Operations Management

RMM team consists of experience mining professionals who have extensive experience at the General Manager level overseeing Mining Operations, Maintenance, Processing, Production, group wide Asset Management, Acquisition, and Investment.

Integrated Sustainable Improvement Projects (ISIP)

The RMM team have a long demonstrable history of performance improvement projects., RMM utilise our asset management and operations expertise coupled with leadership and engagement to provide the sustainability.

PROJECT EXPERIENCE

OEM Life Cycle Optimisation

Global Original Equipment Manufacture

Equipment Supply | Australia

Optimisation of Life Cycle Costing utilising a value engineering approach to optimise the product line in the market.

Mine Site Operational Readiness

Green Fields Mine Site Development
